

# Hybrid On-Site & Cloud Backup

## The Best In-Class Backup & Business Continuity Solution

Agent-based and Agentless (VMware)

Virtual environments

**Converged backup server, backup storage and local BC**

Reduced costs for power and maintenance. Run VMs in recovery scenarios directly on appliance!

**DRaaS Remote BC / virtualization**

Extend 24-7 business continuance and site recovery capabilities to any SMB, capabilities previously not possible without \$\$\$\$ in special hardware

**Logical full backups**

Only move incremental changes over network, saving bandwidth

Physical servers & Laptops

Windows, Mac OSX, and Linux OS

**Datto device**

**SIRIS 3**

**Advance File System Integration**

Leverage ZFS clones to remove backup dependency chains, and provide inline compression, snapshot deduplication, SSD acceleration, and maximum data integrity protection

**Datto Cloud**

Replicated between two Datto Cloud datacenter locations

**Efficient Remote Replication**

Inverse Chain Technology allows flexible retention policies and pruning. Only replicate desired data and not chains of desired data and not chains of dependent data

### Never Lose Your Data Again!

- Hybrid on-site & cloud off-site back-up
- Features business continuity & ransomware detection
- Image agents
- Agentless snapshots
- Unlimited cloud storage
- Virtual server can start up in half an hour so business can continue as usual off of the appliance

### CAN YOU AFFORD TO LOSE YOUR DATA?

**Did you know...** The average business has \$30,000 worth of computer data. And, we have found that many of them have little or no protection at all.

To a business owner, your data is priceless. The loss of your data can put you out of business. In fact, according to Home Office Computing magazine, 30% of all businesses that have a major fire go out of business within a year. 70% fail within five years.

# WatchGuard Firewalls

**Total Network Protection:** Small businesses and remote locations have long been thought of as soft targets for attackers. WatchGuard T Series appliances bring enterprise-level network security to those small office/branch office and small retail environments that matches the reality of today's distributed work style. Our unique product architecture enables smaller businesses to leverage best-in-class security services – from URL filtering and intrusion prevention to application control and data loss prevention – minus the cost and complexity of managing multiple single-point solutions.

**Quick And Simple Deployment:** Cloud-based RapidDeploy technology, a configuration and deployment tool that comes standard with WatchGuard Firebox appliances, enables IT staff to create and store configuration data in the cloud – public or private – and have a new appliance directly shipped to its destination.

**Easy To Manage And Understand:** Firebox T Series appliances are not only easy to initially configure and deploy, they are also designed with an emphasis on centralized management, making ongoing policy and network management simple and straightforward. WatchGuard Dimension, included with purchase, provides a suite of big data visibility and reporting tools that instantly identify and distill key network security threats, issues and trends so you can take immediate preventive or corrective action. Security is complex, running it doesn't have to be.

## Features & Benefits

- Wireless versions of the T10, T30 and T50 use 802.11a/b/g/n/ac technology for a much more responsive wireless network connection and expanded range for 2.4 GHz or less-crowded 5 GHz band.
- All logging and reporting functions included with purchase
- Up to 7 Gigabit Ethernet ports support gigabit WAN connections.
- Includes SSL and IPSec VPN for flex-ibility in remote access with support for Apple iOS devices such as the iPhone, iPad, and iPod touch.
- T30 and T50 models include a PoE port to power a peripheral device such as a WatchGuard Secure Wi-Fi Access Point, allowing to extend the reach of their networks without having to run costly AC power to the remote device.
- Multiple WAN allowing for multiple internet connections for redundancy

## Security Features

- Firewall:** Stateful packet inspection, deep packet inspection, proxy firewall
- Application proxies:** HTTP, HTTPS, SMTP, FTP, DNS, TCP, POP3
- Threat protection:** DoS attacks, fragmented packets, blended threats and more
- VoIP:** H.323, SIP, call setup and session security
- Filtering options:** Browser Safe Search, YouTube for Schools, Google for Business
- Security subscriptions:** APT Blocker, IPS, Gateway AV, WebBlocker, App Control, Data Loss Prevention, Reputation Enabled Defense, Mobile Security, Network Discovery, spamBlocker, Threat Detection & Response
